

HIGH SPEC ENGINEERED QUARTZ SURFACE

Our quartz surfaces consist of approximately 93% natural quartz, together with pigments, and resins.

These are vibro-compacted under vacuum, which results in a non-porous material that has the look of natural stone. Origin Quartz surfaces are 7 on the Mohs hardness scale. (Diamonds are a 10 on the scale as a comparison)

Easy Care

No sealants are necessary due to the surfaces being non-porous. Scratch resistant.

Warranties

Lifetime Limited on residential use
10 years on commercial use
Designed for interior installations only
